PRESIDENT MESSAGE

Cherry Group has been specialized in textile industry for almost 40 years, it always adheres to the business philosophy of providing most competitive pricing, innovative and quality products and services to satisfy our customers needs. Now Cherry Group is a multinational group company with diversified markets, combining manufacture and trade, production and research. With the change of international political and economic situation, Cherry Group keeps adjusting our development strategy.

We have set up our own large production bases not only in China but also in Southeast countries and Indian subcontinent such as Vietnam, Cambodia , Bangladesh and Indonesia covering all product categories. We are also an design-driven company, we have fabric R&D centers and fashion design in China, Spain, United States, South Korea. We continuously update and improve these centers so as to provide global customers with the most competitive products and best services.

At the same time, Cherry Group never forgets our social responsibility and pays great importance to sustainable development. We are people-oriented and dedicated to society. We always try our best to reduce carbon emissions from all aspects including raw materials, design and manufacturing. Our aim is to build a digital and intelligent “Green Clothing Supply Chain”, so as to promote the sustainable development of the whole industry.

LEADING CUSTOMERS

Design House

We are a design-driven group and our global design centers are located across New York, L.A., Dallas, South Korea, Barcelona and China that we can customize our seasonal design & developments for our clients needs.

R&D CAPABILITY

Our R&D divisions could provide PD&D, Fabric & Wash, Technical services. We also use 3D design to transform flat designs into 3D virtual samples, giving customers a photo-realistic impression of their products. Comments and adjustments can be made quickly and effectively, greatly reducing the development time and costs.

SUSTAINABILITY

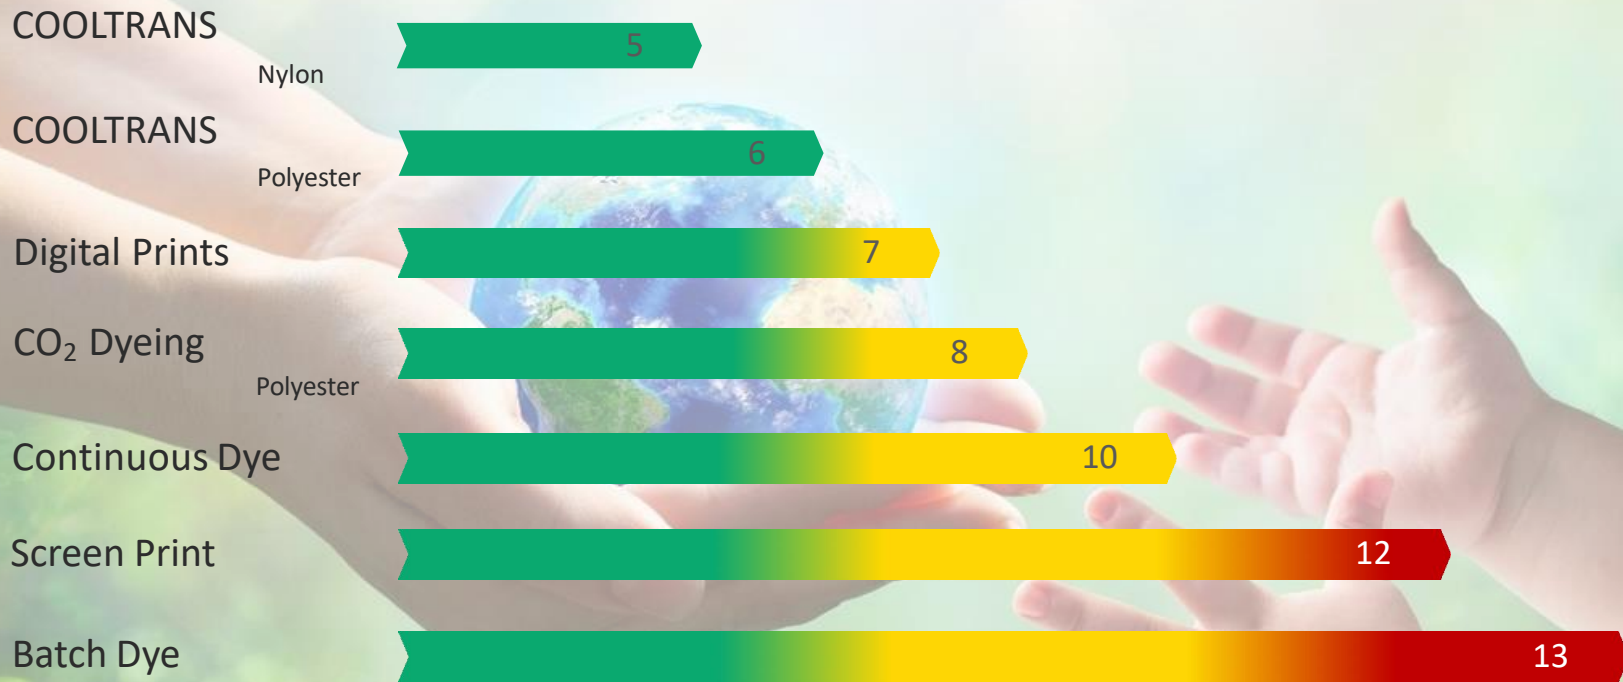

At the moment when the world tells us about development, environmental protection has become a common problem facing the whole world. As a company of high sense of social responsibility, Cherry Group has endeavored to promote sustainability in the supply chain and in our own facilities. For example, we invested \$15m for sustainable washing machines like laser, eflow, ozone machines in our laundry.

Our sustainable washing capacity is 8million pcs per year which can save 60000 tons of water, 6 tons of potassium, 100000 kilos of carbon emission a year. We partner with printing house on a project called Cool Trans Printing which can save 80% carbon emission comparing with traditional dying and washing.

COOL TRANS PRINTING

Lowest impact to the environment of any coloration system available in the world.
